

Q1 JEE Main 2020 - 2 September (Morning)

The statement that is not true about ozone is

- (A) In the stratosphere, CFCs release chlorine free radicals (Cl) which reacts with O_3 to give chlorine dioxide radicals
- (B) It is a toxic gas and its reaction with NO gives NO_2
- (C) In the atmosphere, it is depleted by CFCs
- (D) In the stratosphere, it forms a protective shield against UV radiation

Q2 JEE Main 2020 - 3 September (Morning)

Thermal power plants can lead to

- (A) Eutrophication
- (B) Ozone layer depletion
- (C) Blue baby syndrome
- (D) Acid rain

Q3 JEE Main 2020 - 3 September (Evening)

The incorrect statement(s) among (a) - (d) regarding acid rain is (are)

- (a) It can corrode water pipes.
- (b) It can damage structures made up of stone.
- (c) It cannot cause respiratory ailments in animals.
- (d) It is not harmful for trees

- (A) (a), (c) and (d)
- (B) (a), (b) and (d)
- (C) (c) and (d)
- (D) (c) only

Q4 JEE Main 2020 - 5 September (Morning)

The condition that indicates a polluted environment is

- (A) 0.03% of CO_2 in the atmosphere
- (B) pH of rain water to be 5.6
- (C) eutrophication

(D) BOD value of 5 ppm

Q5 JEE Main 2020 - 6 September (Morning)

The presence of soluble fluoride ion upto 1 ppm concentration in drinking water, is

- (A) safe for teeth
- (B) harmful to skin
- (C) harmful for teeth
- (D) harmful to bones

Q6 JEE Main 2020 - 9 January (Evening)

Biochemical Oxygen Demand (*BOD*) is the amount of oxygen required (in *ppm*):

- (A) For the photochemical breakdown of waste present in 1m^3 volume of a water body.
- (B) for sustaining life in a water body.
- (C) by bacteria to break-down organic waste in a certain volume of a water sample.
- (D) by anaerobic bacteria to breakdown inorganic waste present in a water body.

Answer Key

Q1 (A)

Q2 (D)

Q3 (C)

Q4 (C)

Q5 (A)

Q6 (C)

Q1

Q2

From the thermal power plant CO_2 is released which causes acid rain.

Q3

Respiratory ailments in animals may be due to viral infections or bacterial pneumonia etc; which can be due to acid rain which contains harmful chemicals acid rain is also harmful for trees.

Q4

Eutrophication is a process by which environment gains nutrients for habitats and causes algal bloom, harmful algae produce toxins that are harmful and create dead zones for fish and pollute the environment.

Q5

Fluoride (F⁻) ion conc upto 1 ppm makes the enamel of teeth much harder by converting

Q6

The amount of oxygen required by bacteria to break down the organic matter present in a certain volume of a sample of water, is called Biochemical Oxygen Demand (*BOD*).
